INSTALLATION & CONNECTIONS

IMPORTANT SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

IMPORTANT: Use a qualified electrician for installation of this fixture.

INSTALLATION INSTRUCTION

1. Turn off power at main fuse box.

2. Install crossbar assembly complete with nipple and canopy chain loop to junction box as one complete assembly (Fig. 1).

3. Remove loop ring (B) from canopy loop (C). Slip canopy (D) over loop (C) and secure by fastening loop ring (B). Adjust the height of the nipple so canopy will sit flat against ceiling and tighten locknut (A) against crossbar (E).

4. Remove loop ring (B) and canopy (D) from ceiling.

5. Assemble chandelier as per photo but do not weave wire through chain links yet.

6. Hold chandelier up against canopy loop (C) with chain and adjust to desired height. Remove excess chain.

7. Before fastening chain onto canopy loop (C), weave chandelier wire through every second link.

8. Let the canopy loop ring (B) slip to the bottom of chain. Repeat this step for canopy (D).

9. Tighten chain onto canopy loop (C).

10. Weave wire through the canopy loop and into junction box.

11. Install both ground wires of chandelier (one from the canopy (H) and one from the fixture (I)) to ground screw or ground wire of junction box or ground screw on crossbar.

12. Connect black wire of power supply to the smooth side of the wire (flexible cord) from the chandelier and connect white wire of power supply to the ribbed side of the wire from the chandelier. NOTE: Always use wire connectors or marrettes (included) to connect wires and push all excess wire and connections back into junction box.

13. Lift canopy up to ceiling covering junction box and secure by using canopy loop ring.

GLASS AND BULB INSTALLATION

1. Install glass shade (F) over threaded socket and fasten threaded socket ring (G) over threaded socket. Do Not Overtighten!

2. Install 60W max type A19 bulbs (included)

TURN ON POWER
